LUIZ EDUARDO VIEIRA DE PAULO

Software Developer

PROFESSIONAL SUMMARY

Software Developer with 2 years of experience applying JavaScript, TypeScript, C++, SQL, Node.js, Express, GraphQL, Prisma, and React to build maintainable web services and interfaces. Mentors and teaches complex concepts, having guided students through algorithms, data structures, OOP, SOLID principles, and normalized database design while delivering structured code reviews that improve quality. Eager to contribute to backend and full-stack projects, streamline API design, and continue building scalable, well-tested systems.

EMPLOYMENT HISTORY

TEACHING ASSISTANT **Sep 2024 – Mar 2026**
Langara College ***Vancouver, Canada***

- Mentored and advised approximately 60 students per semester in upper-level computer science courses, improving course outcomes.
- Guided implementation of advanced algorithms including graphs, dynamic programming, balanced trees, and hashing, enhancing students' problem-solving accuracy.
- Assisted students in developing SQL queries and designing normalized relational schemas through 1NF–BCNF principles, improving database design quality.
- Performed detailed grading and technical evaluation of assignments and projects, providing structured code feedback to improve code quality and comprehension.
- Supported software design coursework by teaching OOP, SOLID principles, modular architecture, and clean code practices to strengthen design and maintainability skills.

CLUB ATTENDANT **Jul 2024 – Present**
GoodLife Fitness ***Burnaby***

- Maintained facility cleanliness and enforced safety protocols to protect members and staff.
- Responded to member inquiries promptly, providing courteous assistance and ensuring a professional atmosphere.
- Coordinated with team members to support daily club operations and uphold compliance with safety standards.
- Greet members and assess floor needs to prioritize tasks, enhancing member experience and enabling smoother daily operations with attentive service.

EDUCATION

DIPLOMA IN COMPUTER SCIENCE **May 2022 – Sep 2024**
Langara College ***Vancouver, Canada***

Relevant Coursework: Database Systems, Data Structures & Algorithms, Software Engineering, Full Stack Development

SKILLS

JavaScript *(Experienced)*, TypeScript *(Experienced)*, C++ *(Experienced)*, SQL *(Experienced)*, Node.js *(Experienced)*, Express *(Experienced)*, REST APIs *(Experienced)*, GraphQL *(Skillful)*, Prisma *(Skillful)*, React *(Experienced)*, Tailwind CSS, MongoDB, PostgreSQL, MySQL, Redis, Docker, AWS, Vercel, Railway, GitHub Actions, Authentication, CI/CD, Agile, Problem Solving.

ADDITIONAL INFORMATION

PROJECTS
MoneyFlow (In Progress, 2026)

- Building a personal finance and expense tracking platform focused on transaction management, budgeting, and analytics.
- Designing a scalable backend architecture with REST APIs, relational data modeling, and Prisma ORM.
- Implementing authentication, protected routes, and structured financial data workflows.
- Developing a React-based dashboard for transaction tracking, budgeting, and financial insights.

PROJECTS

SQLBeyond (2025)

- Built a full-stack SQL learning platform with structured query challenges and dynamic evaluation engine.
- Designed RESTful APIs with Express for challenge submission, authentication, and progress tracking.
- Implemented secure authentication and session handling.
- Modeled database schemas to support user progress, challenge validation, and badge-based progression.
- Deployed frontend and backend using Vercel and Railway with CI/CD via GitHub Actions.

LANGUAGES

Spanish *(Proficient)*, English *(Highly proficient)*, Portuguese *(Native)*.
